

Dashboard

Hi! This is your exchange admin panel where you can view certain things like: the users on your exchange, their balances, ongoing transactions and so on. Additionally, you will be able to modify various features of your exchange from here such as the: text, coin listings, fee structure, and more. Below is a brief explanation of what each header does:

Users

This will allow you to see the number of users on your exchange and their details from username, to email address to exploit attempts. User -> Balances will allow you to see what cryptocurrency each user is holding and the quantity.

Transactions

The transactions header enables you to see all the incoming and outgoing of the exchange. Transactions and trades between users can be viewed here, as well as user deposits and withdrawals.

Markets

This section provides an overview of the trading pairs currently enabled on your exchange and the fee structure for them.

Coins

This allows you to see the different cryptocurrency coins available on your exchange and their status - in terms of availability for trading, deposit and withdrawal. Coins -> Withdrawal Addresses show you the addresses linked to each cryptocurrency and their status.

Settings

Settings will allow you to IP ban users, as well as certain email domain names to prevent them from registering with your exchange. Additionally, you will be able to set up email templates here, email clients and perform generic actions.

Utilities

Utilities -> Translation Manager will allow you to modify text on the front-end of your exchange. The "KEY" field will show you the default web content that shows without any modification. To add your own input, click "show" from the rightmost column titled "ID". From here, an HTML text editor will open up and allow you to change the text at any given time.

Admins

This section will allow you to manage who has access to the admin panel and at what level of privilege. All settings to do with admin panel accessibility can be modified here.
